Budget vs Actual | FY2025 | Jan–Dec | EUR

View Summary

One-Time Events:

- Jan: unplanned equipment breakdown, -400 units, +€150K emergency repair
- Mar: unbudgeted new order, +200 units
- Aug: part of budgeted repair completed in Jan, -€20K repair
- Nov: a training session during normal work hours, higher hours per unit (10 →10.3 hours/unit)
- Dec: a raw material quality issue, higher raw material quantity per unit (2.0 → 2.1 tons/unit)

Structural Rate & Price Changes Events

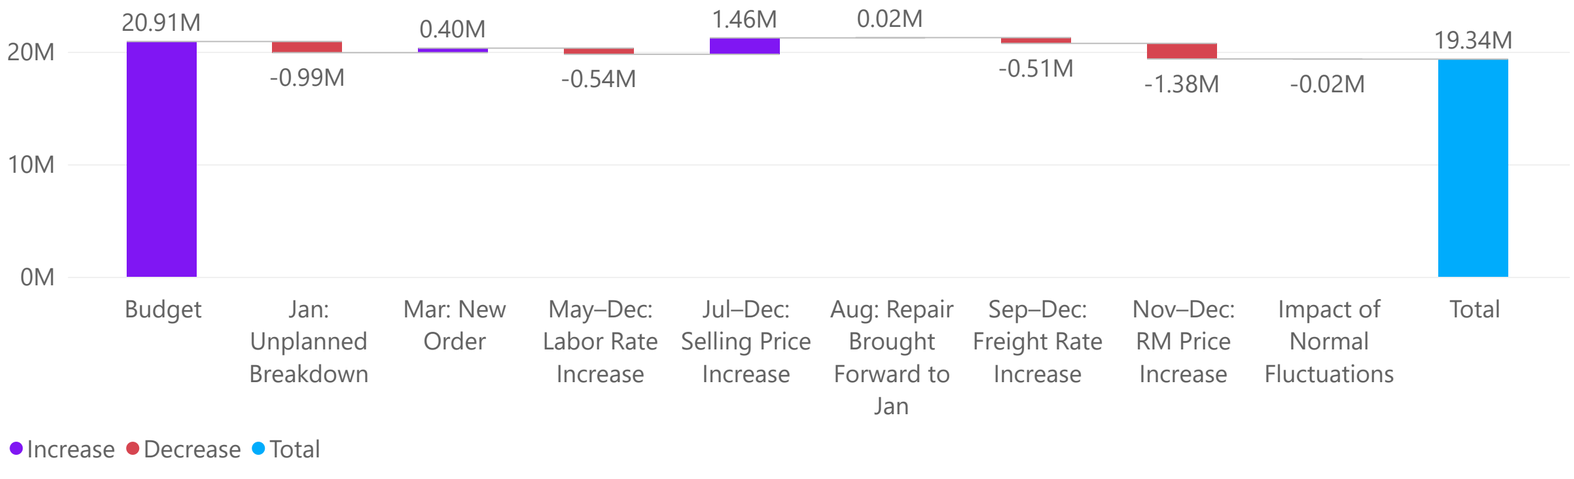

- May–Dec: labor rate increase (regular €50 → €55/hour, overtime €60 → €66/hour)
- Jul–Dec: selling price increase (€5,000 → €5,200/unit)
- Sep–Dec: freight rate increase (€1,500 → €2,000/truck)
- Nov–Dec: raw material price increase (€1,300 → €1,600/ton)

- Gross profit was €19.19M, €1.72M (8.23%) unfavorable to budget. Gross margin was 27.04%, 2.58 pp below budget.
- The largest favorable driver was the Jul–Dec selling price increase (+€1.46M), followed by Mar's new order, which had a net favorable impact on gross profit of €0.40M.
- The largest unfavorable driver was the Nov–Dec raw material price increase (-€1.39M).
- Jan's unplanned equipment breakdown had a net unfavorable impact of €0.99M, reflecting lost revenue and emergency repair costs, partially offset by avoided raw material and freight costs.
- The May–Dec labor rate increase (-€0.55M) and the Sep–Dec freight rate increase (-€0.52M) further reduced gross profit.

vs Forecast ▼ -0.80%

Gross Margin Actual
27.04%
vs Forecast ▼ -0.21 pp

The 9+3 forecast anticipated a €1,567K gross profit shortfall vs Budget, equal to 91% of the €1,722K actual shortfall vs Budget. The remaining €155K came from two events not known at the time of the forecast (Nov's higher hours per unit and Dec's raw material quality issue) and normal fluctuations.

At the Sep close, 22% of the forecast full-year gross profit shortfall vs Budget (€344K of €1,567K) had already occurred; the remaining 78% (€1,223K) was still expected in Oct–Dec, mainly from the Nov–Dec raw material price increase.

Forecast assumptions (Sep close):
Oct–Dec: budget sales volume and Repairs & Maintenance; latest actual (Sep) prices, rates and ratios (hours and raw material quantity per unit); the raw material price increase to €1,600/ton announced for Nov.

Not known at the time of the forecast:
the Nov increase in hours per unit; the Dec increase in raw material quantity per unit.

Recommendation
FY2025 | Jan–Dec | EUR

View Summary

1. Recover cost increases through pricing
The Jul selling price increase (+€1.46M) offset only ~59% of the €2.46M cost impact from the raw material price increase (€1.39M), labor rate increase (€0.55M) and freight rate increase (€0.52M). The gap will widen in FY2026 as the late-year raw material and inbound freight increases take full effect. Evaluate a further price increase, supported by an analysis of customer price sensitivity.

2. Lock in raw material and freight rates
The raw material price increase (since Nov) and inbound freight rate increase (since Sep) added €1.39M and €0.52M of cost. Negotiate multi-year contracts with price caps or volume discounts, and run competitive tenders.

3. Strengthen preventive maintenance
Jan's unplanned breakdown cost a net €0.99M in gross profit through lost revenue and emergency repair costs, partly offset by avoided raw material and freight costs. Implement preventive maintenance on critical equipment and schedule it in low-utilization months.

4. Tighten raw material quality control
Dec's quality issue cost €0.12M through higher raw material usage and inbound freight. Strengthen inspection at goods receipt and add quality requirements and penalty clauses to supplier contracts.

5. Schedule training in low-utilization months
Nov's training during peak production (116.5% utilization) added €26K of overtime cost. Schedule training when idle regular hours can absorb it.
